

Pavia, Aula Magna dell'Università degli Studi
5 October 2009

workshop on

Advances in crystallographic methods for the study of magnetism

under the patronage of

Organizing Committee

Paolo Ghigna
Giorgio Spinolo
Michele Zema
Vincenzo Massarotti

INVITED SPEAKERS

François de Bergevin (ESRF, Grenoble)

Introduction to magnetic phenomena in transition metal compounds

Roberto Caciuffo (Institute for Transuranium Research, Karlsruhe)

Recent advances in magnetic neutron scattering

Luigi Paolasini (ESRF, Grenoble)

The ID20 magnetic scattering beamline at ESRF

Claudio Mazzoli (ESRF, Grenoble)

X-Ray polarimetry development in the field of magnetism investigation

Welcome speech of Academic and IUSS Authorities

Closing round-table discussion
