Università Vita-Salute
San Raffaele

Milan, June 27th 2024

Position available

One fellowship is available at the Biocrystallography Unit of the San Raffaele Scientific Institute in Milano (Italy) to study the mechanisms of mycobacterial resistance to antibiotics. We are seeking a motivated candidate who is enthusiastic about understanding the molecular aspects of the effect of mutations on mycobacterial gene products that are the target of commonly-used antibiotics against tuberculosis. Preference will be given to individuals with prior experience with molecular biology, protein purification or structural biology techniques. Applications from individuals at any career stage will be considered. Starting date can be as early as September 1st 2024. Please send your cv and two letters of reference to degano.massimo@hsr.it
